

How to download images from Flickr, read the album notes & other neat stuff!

A

First, go to the Flickr website
<http://tinyurl.com/sdean-dance>
and select your camp by clicking on its icon

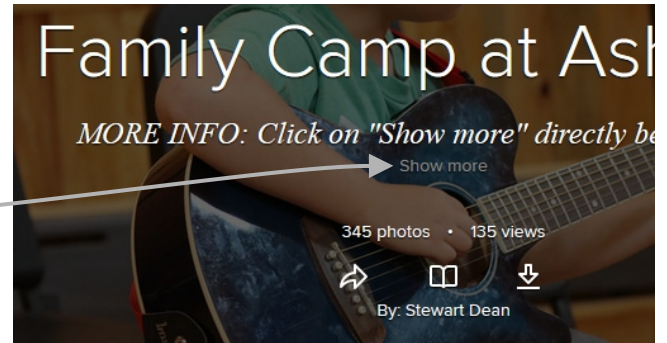

B

That will bring up a page of just your camp and thumbnail-sized images from it..

To read the album notes...

Put your mouse pointer on the words "Show more".

That will open a window with slider bar in which you can read the notes. When you are done reading, click on the Done button.

C

To download a picture....

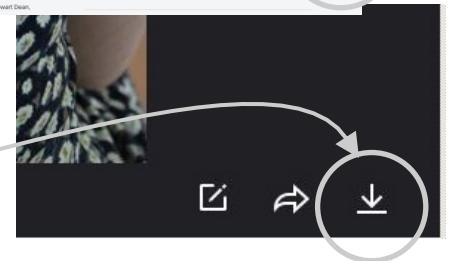

1

Find the picture you want and click on it...*that will take you to a page with just that image, like the image on the right*

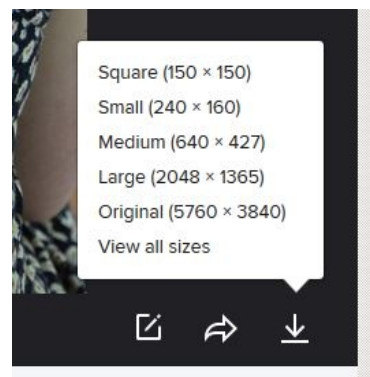

2

At the bottom right of the image, you will see an arrow pointing down to a horizontal line OR 3 dots (...) in a row

3

Click on whichever one of those is applicable

4

Choose the size you want. I suggest downloading the Original size, then resizing it on your computer to whatever you need.
